Niagara Falls

- Temperate - hot dry summers, and cooler wetter winters, Mediterranean e.g. United Kingdom
 - Continental - long, cold winters and short, hot summers, inland areas e.g parts of Turkey
 - Polar - long periods of extreme cold,undra, ice cap e.g. Antarctica
 - Tropical - hot and humid, wet, rainforest e.g. Brazil
 - Dri - arid, desert e.g. Saudi Arabia

The four main **climate** zones,
determined by **latitude**.

The Köppen System is a climate classification system. It is split into five main groups which each consist of a range of climate types:

Polar	60° - 90°	Polar	60° - 90°
Temperate	40° - 60°	Temperate	40° - 60°
Sub-tropical	23.5° - 60°	Sub-tropical	23.5° - 60°
Tropical	0 - 23.5°	Tropical	0 - 23.5°
Sub-tropical	23.5° - 40°	Sub-tropical	23.5° - 40°
Temperate	40° - 60°	Temperate	40° - 60°
Polar	60° - 90°	Polar	60° - 90°

Continents and Oceans

Year 6

The Americas

The countries below Mexico are known as Central America but are classified as being located in the continent of North America.

The USA is divided into 50 states. Canada is divided in 10 provinces and 3 territories.

General information:

South America is a **continent**. It has 12 **countries** plus 2 regions that belong to European countries: (1) The Falkland Islands which is a British territory, and (2) French Guiana which is owned by France.

The **equator** runs through the north of the continent. The country Ecuador literally means equator in Spanish.

Most of the continent is in the **southern hemisphere**.

All countries in South America speak

Spanish apart from Brazil, where they speak **Portuguese**.

The 4 main languages spoken in North America are English, Spanish, French and Creole,

The Americas

- The Americas are two separate **continents** consisting of North America and South America.
- North America contains 23 different countries.
- The Americas cover a huge area of the globe, extending over several lines of **latitude** and longitude.
- The characteristics of different countries and regions vary significantly, including **weather**, land use and **flora** and **fauna**.

Key Vocabulary

biomes A large geographical area which is home to certain plants and animals, specially adapted to suit the environment.

climate The usual or average **weather** conditions over a long period of time.

continent A large landmass made up of many **countries**.

country An area that is controlled by its own government.

equator An imaginary line around the globe at **latitude** 0° north dividing the earth into northern and southern hemispheres.

flora/fauna Plant and animal life.

latitude Imaginary parallel lines which circle the globe from east to west.

longitude Imaginary lines which run north to south across the globe from pole to pole.

weather The specific atmospheric conditions on a given day including temperature and rainfall.
